## Dead Or Alive 5 Announced November 22, 2006

Posted by 360lounge in Uncategorized.  
[1 comment so far](#)

Itagaki, legendary creator of the Dead Or Alive series, has apparently let slip that a fifth in the series is on its way, so oxm.co.uk reports.

"Speaking at a 10 year anniversary event for the series, the developer also commented that he has the first in-game 'play concepts' in mind. Videogamesblogger.com went on to report that this title is set to drop the tag battles seen in previous versions although specific details with regard to probable formats, or indeed a prospective release date, were scant."

It seems a bit strange that tag-battles would be dropped – if anything, that may turn away some fans of the series, such as myself, who thoroughly enjoyed tag team match ups, especially the way they took the focus off competitiveness, instead promoting intense teamwork, but either way, it looks as though the Microsoft and Tecmo partnership is set to continue.

## Assassin's Creed confirmed September 4, 2006

Posted by 360lounge in Uncategorized.  
[add a comment](#)

Originally thought to be Playstation 3 exclusive, Assassin's Creed has been officially announced as an upcoming Xbox 360 title. Assassin's Creed looks to be a big hit for next years lineup. Producer Jade Raymond had this to say in an [interview with Gamespot](#):

Jade Raymond wrote:

Our ambitions with Assassin's Creed are high:

We're aiming to deliver a completely new gameplay experience on a brand-new engine. With artificial intelligence, physics, animation, and graphics ambitions like ours, we weren't sure how many consoles we could support. But we always wanted to share our next-gen vision with as many gamers as possible. We have just recently been able to prove to ourselves that we will be able to deliver on both systems without sacrificing the quality or innovation of our original concept.

## A new controller for the Xbox 360? June 21, 2006

Posted by 360lounge in [Accessories](#).  
[add a comment](#)

Gamepro just informed us about a new 360 remote they were able to beta test. The new remote is said to have far more advanced sensitivity, especially in the rumble pack.

[quote]

- A lightsaber effect that caused the entire controller to quiver subtly, then pulse realistically when the lightsaber was deactivated
- A heavy recoil effect when firing a rocket launcher, with the feedback trailing off as the rocket propelled into the distance
- Rapid-fire vibrations from a machine gun; each individual jolt seemed to be synched directly to the gun's firing rate
- A subtler "weapon switching" effect that gave you a hint about your next weapon; heavy guns produced a strong jolt, while small guns gave lighter one

[/quote]

## Prey demo coming soon June 17, 2006

Posted by 360lounge in [Games](#), [Xbox Live Marketplace](#).  
[1 comment so far](#)

The next demo to grace Live will be 2K games FPS Prey.

According to OXM the demo will be coming out in the US on the 21st of June and later in the UK on the 22nd of June.

The demo is said to be both a singleplayer, and multiplayer romp, with almost an hours worth of singleplayer wispered.
